also

Will you inform P.O.? I have reported it here.

[illegible]

Mar 2. 07

PADDOCK WOOD VICARAGE
KENT.

Medway

The gauge has arrived, but the measuring glass is broken – why I do not know, as it was apparently quite carefully packed. It will measure all right at present as it is clear to ·35, but shd. be replaced as the crack and big notch out of the glass is dangerous.

Thanks for y. letter

Geo. B. Charles

FORM A2.
BRITISH RAINFALL.

4 JAN 1911

Kept at Experimental Grounds Golden Green. Tonbridge

in the County of Kent 4

by F. W. E. Shrivell

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
„ „ „ Sea Level ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Tonbridge
Distance 4 miles Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. MILL, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

17 MAR 1911

Kept at Stadlow Place

in the County of Kent 4

by C. J. G. Walker.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 50 ft.

Time of Observation 9 am

Nearest Railway Station
Name Tonbridge
Distance 4 Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.
3 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Hollanden House Hildenbro'

in the County of Kent 4

by C. H. Scott

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 161 ft.

Time of Observation 9 a.m.

Nearest Railway Station
Name Hildenborough
Distance 1 mile Direction SSW.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Kent 4

Ide Hill Vicarage
Sevenoaks
Mar 9/11

Dear Sir

I am answering your letter to my daughter relative to the rainfall on Jan 27. 1910. My daughters are quite young but they take great interest in their record and are very particular. Their records are distinct as to no rain on Jan 27: ~~and~~ is but .09 rain on Jan 28 — ~~they are~~ and the total for the month is 1.53 -

My own diary tells me that we had
a special meeting on Jan 27 - and
it was not marred by ~~the~~ rain in
any way - as it would certainly have
been if 3/4 of an inch had fallen: but
we had a tempestuous night that is
noted.   The rain here is often very
local   I remain

yrs v. truly

(Canon) W. A. Rarke

FORM A2.
BRITISH RAINFALL.

2 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Ide Hill Vicarage

in the County of Kent

by Miss A C M Raikes

4

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 9 in.
" " " Sea Level 900 ft.

Time of Observation 9 A M

Nearest Railway Station
Name Sevenoaks
Distance 4½ m Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2.
BRITISH RAINFALL.

26 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Belmont Lodge Ightham
in the County of W. Kent 4
by B. D. Kilburn Esq

Rain Gauge: Pattern ____ Diameter of top ____ in. Height of top above Ground ____ ft. ____ in. „ „ „ Sea Level ____ ft.

Time of Observation ____

Nearest Railway Station: Name ____ Distance ____ Direction ____

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Kept at Unwoles Bank, Tonbridge

in the County of Kent 4

by J Waley Cohen

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 8 in.
" " " Sea Level 319 ft.

Time of Observation 8·30

Nearest Railway Station
Name Tonbridge
Distance 3½ miles Direction W

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

4 JAN 1911

Kept at Runwood Gardens Langley Maidstone
in the County of Kent 4
by W. J. Gould – Head Gardener to W. S. Forster Esq

RAIN GAUGE Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 1 ft. 9 in.
" " " Sea Level 354 ft.
Time of Observation 9. A. M.
Nearest Railway Station Name Maidstone West
Distance 4 Miles Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
2 JAN 1911

Kept at *Linton Park*

in the County of *Kent* 4

by *Charles Pratt*

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground ft. 10 in.
" " " Sea Level ft.

Time of Observation 9 A.M.

Nearest Railway Station
Name *Maidstone*
Distance 4 mile Direction ~~South~~ NORTH

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

20 JAN 1910

Kept at Margate

in the County of Kent

by John Stokes

RAIN GAUGE
Pattern Symons
Diameter of top 5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level 77 ft.

Time of Observation 9am

Nearest Railway Station
Name Margate Sands
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL. 30 JAN 1911

Kept at Margate

in the County of Kent 2

by John Stokes

Rain Gauge:
Pattern Symons
Diameter of top ~~12~~5 in.
Height of top above Ground 1 ft. in.
" " " Sea Level ft.

Time of Observation 9 am

Nearest Railway Station: Name Margate Sands
Distance 1/4 m Direction WSW

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A2. BRITISH RAINFALL.

18 JAN 1910

REGISTER OF RAINFALL IN 1909

Kept at Martin Mill

in the County of Kent

by The East Kent District Water Coy

RAIN GAUGE
Pattern Snowdon
Diameter of top 5 in.
Height of top above Ground 11 ft. in.
" " " Sea Level 298 ft.

Time of Observation 9 am

Nearest Railway Station
Name Martin Mill
Distance ½ mile Direction SSE.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

1910

REGIS

FORM A2. BRITISH RAINFALL

3 FEB 1911

0.

Kept at Meresborough

in the County of Kent

by Sydney Wake

v T Smith

5 in.

Ground 1 ft. — in.

Sea Level ft.

a.m

Name Rainham

Distance 2 m Direction N

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.
-3 JAN 1911

Kept at Pembury Waterworks Tun: Wells.

in the County of Kent 4

by W H Maxwell Am I.C.E.
Water Engineer

RAIN GAUGE
Pattern
Diameter of top 8 in.
Height of top above Ground 1 ft. 8 in.
" " " Sea Level 196 ft.

Time of Observation 9·0 AM.

Nearest Railway Station
Name Tunbridge Wells.
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

FORM A2.
BRITISH RAINFALL.

3 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at St. Mary's Hall –
in the County of Kent. 4 St. Mary's, Hoo.
by Henry Pye.

RAIN GAUGE
Pattern Dollond.
Diameter of top 5 in.
Height of top above Ground 5 ft. 6 in.
" " " Sea Level 146 ft.

Time of Observation 9. a.m.

Nearest Railway Station
Name Sharnal Street
Distance 2 miles. Direction S.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.

12 JAN 1910

Kept at Sandgate [illegible]

in the County of Kent

by C. J. Conquest; Engineer & Surveyor

RAIN GAUGE
Pattern —
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 51·5 ft.

Time of Observation 9·0 am

Nearest Railway Station
Name Sandgate
Distance ½ m Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2. BRITISH RAINFALL.

6 JAN 1911

Kept at Sandgate

in the County of Kent

by Chas J Conquest Engineer & Surveyor

Rain Gauge
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. – in.
" " " Sea Level 51·5 ft.

Time of Observation 9.0 a.m.

Nearest Railway Station
Name Sandgate
Distance ½ m Direction W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers,*" sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1910

FORM A2.
BRITISH RAINFALL.

13 JAN 1911

Kept at Luton. Selling

in the County of Kent 3

by Fr Ivo Neame

Rain Gauge
Pattern Howard
Diameter of top 5 in.
Height of top above Ground 4 ft. 9 in.
" " " Sea Level 263 ft. 310

Time of Observation 7.30. a. m

Nearest Railway Station
Name Selling. S.E.C.R
Distance 1m Direction N.E.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

REGISTER OF RAINFALL IN 1909

FORM A2.
BRITISH RAINFALL.
8 JAN 1910

Kept at Chevening Park Gardens

in the County of Kent.

by C. Sutton.

RAIN GAUGE
Pattern
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 360 ft. 385

Time of Observation 9. a. m.

Nearest Railway Station
Name Chevening Halt.
Distance about 1 mile Direction S. SE

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

FORM A2. BRITISH RAINFALL.

-6 JAN 1911

REGISTER OF RAINFALL IN 1910

Kept at Chevening Park Gardens

in the County of Kent 5

by C. Sutton

RAIN GAUGE
Pattern Snowdon - Negretti & Zambra
Diameter of top 5 in.
Height of top above Ground 1 ft. — in.
" " " Sea Level 360 ft. 385

Time of Observation 9 a.m.

Nearest Railway Station
Name Chevening Halt
Distance 3/4 mile Direction S.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Time of Observation

Nearest Railway Station
Name
Distance .... Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Name
Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Jan. 1, following.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Distance Direction

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

1st April, 1912.

Dear Sir,

Rainfall Returns, 1911 - Westerham Town.

In reply to your letter of the 28th ultimo I beg to state that my letter to you on the 28th October last stated that the Rain Gauge was to be removed on the 1st November from Mr. Evenden's premises, London Road, Westerham, and not from the "Fish Ponds". The present altitude of gauge is about 345 O.D. and the distance from the late position in London Road to the new one in Quebec Square is,(as requested by you in your letter of the 30th October,)as stated in the November Returns 725 yards South.

The exposure of the gauge is not to any considerable extent modified by the removal and the readings of the gauge are taken daily by the Board's Officer at Westerham.

I am,

Yours faithfully,

Fredk. Melhuish

H.R.Mill, Esq.,

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

Corr. for

Station BEKESBOURNE 2½ MLS.

2 Jan– 19

Dr H. R. Mill

Dear Sir

I enclose my rainfall return for this station for the past year. As this is the first time I have taken observations I started without taking due note of your instructions as to the measurements being recorded for the previous day. However I have filled in the figures for 1 Jan. & have begun this year on the correct basis –

Yours faithfully

Alex Barrett

Distance 1 mile Direction West

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.

IMPORTANT NOTE.—Rain should be measured daily at 9 a.m., and the result entered to the previous day. If an Observer prefers not to conform to this almost universal rule, he is earnestly requested to add the reading at 9 a.m. on 1st January of the following year in the space provided for it at the end of this paragraph. Full instructions for the measurement of rain, the selection and placing of rain gauges, and particulars as to the British Rainfall Organization are given in "*Rules for Rainfall Observers*," sent post-free on application to Dr. H. R. Mill, 62, Camden Square, London, N.W.
